DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 2-2-06 have been fully considered but they are not persuasive.
2. Regarding the 35 USC 112, first paragraph rejection Applicant contends support is provided at Example 1 on page 7 and page 25 lines 5-24. The Examiner disagrees because the specification does not support the transitional phrase "consisting of". Example 1 of Applicant's specification describes a medical method including administering Atorvastatin in combination with a requirement for reduced alcohol consumption (page 10, line 12), occasional use of antacids (page 11, line 25), the suggestion to take one aspirin daily (page 16, line 4), and suggestion to modify diet, smoking, and exercise habits (page 17 lines 15-17). The transitional phrase "consisting of" defines the method to include only the recited steps. The specification must provide explicit support for such method. MPEP 2163 II A-1 recites: "The claim as a whole, including all limitations found in the preamble, transitional phrase, and the body of the claim, must be sufficiently supported to satisfy the written description requirement. An applicant show possession of the claimed invention by describing the claimed invention with all its limitations."
3. The Examiner maintains the specification lacks explicit disclosure of a method consisting of the sole step of administering Atorvastatin.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1,5,6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically the limitation "consisting of" lacks sufficient support in the originally filed specification. Applicant describes at page 10, line 12 the requirement for limited alcohol consumption, page 16 line 4 suggests administration of aspirin, and page 17 line 17 describes modifications to diet, smoking, and exercise. Therefore modifications to diet, supplemental drugs, and reducing alcohol intake are included in applicant's disclosed method. Applicant's disclosure fails to disclose a method comprising solely the step of administering cholesterol-lowering agents as the claims currently require. For purposes of examination "consisting of" is interpreted to distinguish the number of drugs used but the overall method may include dietary modifications.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1,5,6,11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Bocan WO 97/16184.

5. Bocan discloses in lines 16-24 and 28-36 of page 2, 12-35 of page 3, 1-12 of page 5, and 7-12 of page 10 a method of administering 80mg/day of Atorvastatin alone in patients having coronary artery disease in need of revascularization treatment resulting in an aggressive lowering of LDL cholesterol by about 50%. Note Bocan discloses both administration of Atorvastatin alone (p10, lines 7-12).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
